

Taylor Price

She/Her/Hers

Describe your research interests using only pictures.

What is a question people always ask you when they learn what you do? What is your typical response?

Are glaciers really melting? Yes, Glacier National Park has seen quite a loss of glaciers. They have image documentation on their website

What is one of your favorite aspects of your work? What is one of the most challenging?

Being in the mountains and I find bioinformatics/sequencing is challenging.

If you could study any one topic or idea, and money/time/equipment were not an issue, what would you study?

Addressing the temporal changes and diversity of fungi during the development of glaciers.

Outside of your scientific studies, what other subjects or interests motivate you?

I am interested in planetary sciences, philosophy, cultural diversity, theoretical mathematics (i.e. Steve Smale's work), and fictional literature.
